PROFILE

M.A.-trained digital-media researcher and higher-education lecturer with experience in human-centred digital projects, interactive data visualisation, web technologies, and project-based teaching. Developing a research career focused on human-computer interaction, explainable AI, and how people understand and steer interactive systems. Brings cross-cultural experience across China, the United States, and the Netherlands; strong communication, coordination, and academic-writing foundations.

RESEARCH FIT & METHODOLOGICAL FOUNDATIONS

Research interests: human-computer interaction; human-centred and explainable AI; interactive visualisation; user experience; human-in-the-loop systems; interactive problem solving.

Methods & tools: research synthesis and academic writing; user/stakeholder interviews; user analysis; data organisation and visualisation; interaction and workflow design; web technologies (HTML/CSS); Python and SQL (basic); Jira.

RELEVANT ACADEMIC EXPERIENCE

Master's Thesis Researcher, M.A. Integrated Digital Media | New York University

New York, USA | 2013 - 2015

- Conducted an M.A. thesis project on web-based interactive digital media, examining data presentation, interactivity, and user experience.
- Developed "Pop Bike," a web-based interactive data-visualisation study that connected data representation with user interaction.
- Produced research writing and project documentation, strengthening the ability to translate digital interaction questions into structured research outputs.

Lecturer & Founder, GPEC | Guiyang Preschool Education College

Guiyang, China | Nov 2019 - Oct 2024

- Designed and taught courses in interactive design, web design, web-based data visualisation, and HTTP protocol.
- Founded GPEC, a project-based learning space supporting cross-disciplinary digital-media projects and collaboration.
- Supervised student teams in a mobile-app development competition; received Municipal Outstanding Teacher recognition.

Lecturer | Tarim Institute of Technology

Xinjiang, China | Nov 2024 - May 2025

- Delivered foundational courses, supported teaching-team development, and mentored new faculty in course design and instructional planning.

PROFESSIONAL EXPERIENCE

Co-founder / Project Lead | Woolara (DTC Cashmere Brand)

Maastricht, Netherlands | Apr 2025 - Present

- Lead an end-to-end cross-border e-commerce project, coordinating suppliers, logistics, customer communication, and customer-facing delivery workflows.
- Built and manage a Shopify store, including product setup, checkout flow, post-purchase processes, content, and basic SEO; gained direct insight into digital consumer touchpoints and choices.
- Managed an Ulule crowdfunding campaign that reached 167% of its target with 25 backers.

Product Manager | Wangsu Technical Corp. (B2B SaaS / CDN Platform)

Xiamen, China | Oct 2016 - Nov 2019

- Led requirements gathering, market and competitor analysis, PRD writing, workflow design, and stakeholder communication across engineering, sales, operations, and clients.
- Delivered an internal automation-platform MVP within three months; designed 30+ management pages across provisioning, billing, and integrations, and produced user-facing documentation and reports.

ADDITIONAL EXPERIENCE

Program Manager, Platinum Maintenance Services Corp. (New York, 2015 - 2016) Organised public events (up to 500 participants), prepared grant applications, and secured at least US\$40,000 annual funding.

Digital Marketer, CareerTu (New York, 2015 - 2016) Conducted competitor and customer-behaviour reporting using Google Analytics; supported SEO and digital campaigns across large-scale content platforms.

EDUCATION

M.A., Integrated Digital Media | New York University, New York, USA | Jan 2013 - Jan 2015

B.E., TV & Video Broadcast Engineering | Communication University of China, China | Sep 2006 - Jun 2010

SELECTED PUBLICATION & RECOGNITION

Zhang, Q. (2022). *A Research of Web-based Interactive VR Design: 3D Panoramic View of the Campus in Campus Culture Constructing.* *New Education*, 34-36.

Recognition: Municipal Outstanding Teacher; supervised student teams awarded second prize in the 2022 Guizhou Vocational College Skills Competition (mobile app development) and the Web 2.0 College Students Start-Up Competition.

CORE SKILLS

Research Skills Human-Computer Interaction; Qualitative Research; Interview Design; User Research; Literature Review; Research Design; Academic Writing.

Analytical Skills Interactive Data Visualisation; Data Analysis; Information Synthesis; Basic Statistical Analysis; User Insight Reporting; Workflow Analysis.

Technical Python (Basic); SQL (Basic); HTML/CSS; Excel; R (Basic); Tableau; Power BI; Jira; Google Analytics.

Research Practice Project Coordination; Stakeholder Communication; Documentation and Reporting; Cross-cultural Collaboration; Teaching and Student Supervision.

SELECTED RESEARCH-RELEVANT PROJECTS

Pop Bike (NYU M.A. thesis) Web-based interactive data-visualisation study developed within the Integrated Digital Media programme, connecting data representation with user interaction and experience.

Web-based Interactive VR Design Published research on a 3D panoramic campus experience, investigating the role of web-based interaction design in digital environments.

GPEC Founded a cross-disciplinary project-based learning space supporting student digital projects and collaboration.
